DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The phrases "permanent and non-movable" and "having a same color as a background" were not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is simply no disclosure of the type and color of censorship box in the original specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Cousins '439. Cousins discloses a method containing all of the elements of the claims including with reference to claim 1, identifying material to be banned (figure 1B) on a tangible medium (12) and using a permanent and non-movable box having a same color as a background of the printed medium in place of the material to be banned (figure 1C and col. 3, lines 38-41). Banned material being textual matter, as required by claim 2, is shown in figure 1C. Material to be banned being images, as required by claim 3, is shown in figure 1B, as images of the text characters 16. Material to be banned being transmitted over a visual arts medium, as required by claim 4, is shown in figure 1B where the visual arts medium is a book 12.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Karlan '621. Karlan discloses a method containing all of the elements of the claims including with reference to claim 1, identifying material to be banned (figure 1) on a tangible medium (14) and using a permanent and non-movable box having a same color as a background of the printed medium in place of the material to be banned (figure 6, elements 24(2), 24(3) and 24(4) and col. 3, lines 29-31). Banned material being textual matter, as required by claim 2, is shown in figure 1-3. Material to be banned being images, as required by claim 3, is shown in figures 1-3, as images of the text characters 20. Material to be banned being transmitted over a visual arts medium, as required by claim 4, is shown in figures 1-2 where the visual arts medium is a sheet 14.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
